# **U FORM DEEP CONTOUR BACK**

**ADJUSTABLE • LIGHTWEIGHT • ADAPTABLE • EASY**

The new U Form Deep Contour Back is our latest design. It gives Vendors and Therapists greater flexibility to customize a product that is readily available and easy to adjust and work with.

The segmented foam structure is available in a number of configurations allowing the back to be built to meet the clients unique requirements. Sections can be removed, exchanged with other foam densities or removed to accommodate specific positioning needs. The segmented foam structure is formed with an additional  $\frac{3}{4}$ " topper for added comfort and transition between the outer cover and the firmer inner foam segmented level. The standard segmented cube structure comes in the following size, 2 x 2 x 2 1/2". The number of strips will vary depending on the size of the Back Cushion, but the therapist has lots of options to form the structure to the client's needs while supporting the whole back area.
