MODULAR TROUGH SUPPORT SYSTEM

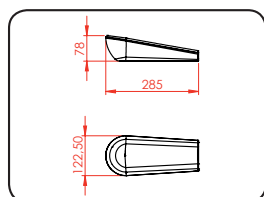

The modular trough arm support system consists of six polyurethane parts and one swivel arm, which can be individually combined with each other, offering the best comfort for wheelchair users.

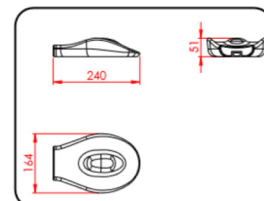

Polyurethane foam parts are recognized for durability and low weight and suited for use in damp and hygienic environments.

The 360 ° swivel, turn able hardware provides extra flexibility in positioning an arm, allowing the clinicians to mirror the arm's position

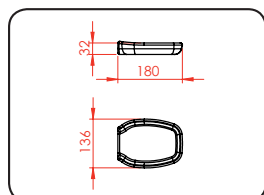

The 360 ° swivel arm and the special shape of the polyurethane parts, makes our arm support system particularly suitable for wheelchair users with half-sided paralysis.

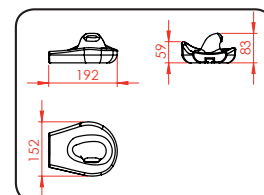

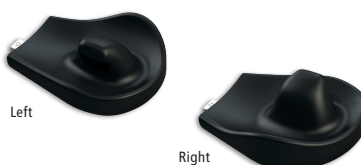

SUPPORT WITH SLOT NUTS for optimal forearm stabilisation and positioning
Part # **RPU1S**

PALM EXTENSOR HAND REST incl. connecting element with 4 grub screws. Fits left or right hand
Part # **RPUH5**

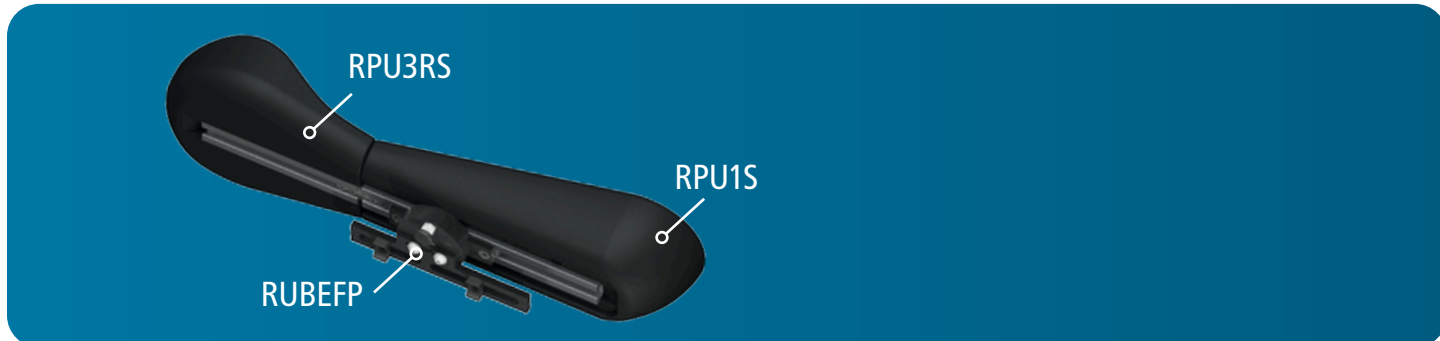

FLAT HAND REST, incl. connecting element with 4 grub screws
Part # **RPU2**

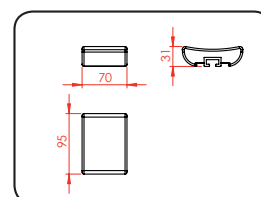

HAND REST with anatomic handle, incl. connecting element with 4 grub screws

Side	Part #
LEFT	RPU3LS
RIGHT	RPU3RS

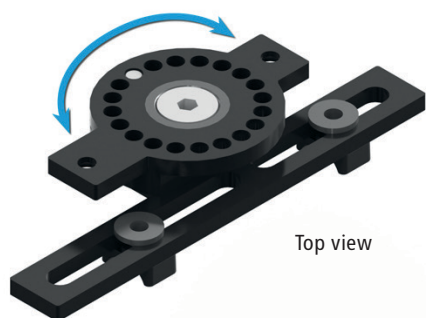

EXTENSION PIECE with connecting plate and 4 grub screws
Part # **RPU4S**

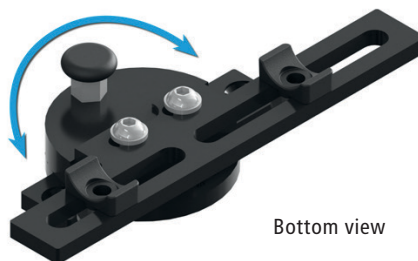

ATTACHMENT SYSTEM

360° TURNABLE SWIVEL ARM with round tube adapter for attachment, mountable on the left or right side, incl. 2 slot nuts, outreach 17.5 mm, hole distance 141 mm
