

## SELF-INFLATING • LIGHTWEIGHT • EASY • CUSTOM FIT FOR EVERY USER

The AIRpad offers stability and comfort in wheelchair and other seating applications. The AIRpad is a light weight, slim profile cushion that prevents soreness and promotes the healing of slight decubitus ulcers.

The combination of visco-elastic foam and an adaptive air bag provide pressure relief and soft positioning. The **AIRpad** can be used for preventative and for decubitus therapy up to stage I of EPUAP. For every users body shape the cushion can be adapted individually by adjusting the air volume of the air bag. The user's weight is spread over the total seating area reducing pressure on sensitive skin. Additionally the user's position is stabilized by the memory foam inside the air bag.

Adjusting the **AIRpad** to a user is very easy because of the quick adjusting two-way valve. An air pump is not need as the cushion is self-inflating!

Bottom of cover and cushion colour matched for easy reassembly.

Slot for valve in cover

Pocket for zipper puller

## AIRpad CUSHION - SELF INFLATING
